Automated Manual Creation

Sales Support Productivity Solution

- Reduce System Implementation Time
- Reduce Documentation Creation Costs
- Improve Documentation Accuracy

Problem Description

A small supplier of custom educational program management software was experiencing unacceptable delays in system implementations and was incurring high costs in the production of manuals for their custom software.

AIM Solution

AIM engineers and software developers worked with client technical experts and documentation specialists to develop an automated process that interfaced directly with their order entry and product development database to produce detailed, custom product documentation with nothing more than a few simple mouse clicks. Furthermore, the system was capable of automatically producing updated manuals anytime system features were changed, augmented, improved, or updated.

Benefits

Product documentation production time was reduced from 30 days to less than one hour. Accuracy was substantially increased while production costs were radically reduced.

Why choose AIM?

Choose AIM to guarantee a quality project managed by a hands-on project manager, engineer, MBA, with Six Sigma quality credentials and decades of experience not only designing and implementing productivity and management solutions, but using them as a "real-world" professional manager.

Choose AIM to ensure your project does not go over budget. AIM can offer fixed or ROI-based pricing. Over many years and dozens of projects, AIM has never exceeded a fixed priced budget – and never will.

Choose AIM to reduce delays and missed deadlines. AIM eliminates needless layers of management and communication obstacles inherent to traditional project teams.

Choose AIM because you want a partner with both a winning attitude and record that brings a competitive advantage to your team.
