

Data Warehouse Design

Government Program Management

- Performance Analysis
- Contract Monitoring
- Management Reporting

Problem Description

A state Department of Administration division required a data warehouse capable of accepting and analyzing performance data from multiple internal departments and vendors with widely varying metrics. The current system was incapable of providing the comparative analysis needed to make management decisions regarding which programs were most cost efficient and should be retained.

AIM Solution

AIM interviewed dozens of internal and external stakeholders, reviewed internal reports, procedures, and historical documentation as part of a business requirements specification for a new data warehouse. Rather than simply provide an abstract report, AIM developed a prototype database design and interface to help stakeholders visualize and understand how the requirements they provided would translate to the design implementation.

Benefits

The client received a business requirements and data warehouse design specification that directly tied stakeholder requirements to specific technical performance requirements. The final document was so specific that the client requested AIM to provide a more generic version in order to provide more latitude to bidders.

Why choose AIM?

Choose AIM to guarantee a quality project managed by a hands-on project manager, engineer, MBA, with Six Sigma quality credentials and decades of experience not only designing and implementing productivity and management solutions, but using them as a “real-world” professional manager.

Choose AIM to ensure your project does not go over budget. AIM can offer fixed or ROI-based pricing. Over many years and dozens of projects, AIM has never exceeded a fixed priced budget – and never will.

Choose AIM to reduce delays and missed deadlines. AIM eliminates needless layers of management and communication obstacles inherent to traditional project teams.

Choose AIM because you want a partner with both a winning attitude and record that brings a competitive advantage to your team.
