

Factory Shipments Analysis

Manufacturing Productivity Solution

- Track Manufacturing Performance
- Reduce Human Resource Requirements
- Provide Management Reporting

Problem Description

The manager of mid-sized manufacturing plant located in the Southeast US was spending an inordinate amount of time managing and tracking the shipments performance of their plants.

AIM Solution

AIM worked remotely via phone, e-mail, and web conferencing with both plant and IT staff to develop a fully automated process to acquire and analyze plant shipments data on a daily basis.

Benefits

The time to produce daily shipments analysis and reporting was reduced to less than 10 minutes.

Why choose AIM?

Choose AIM to guarantee a quality project managed by a hands-on project manager, engineer, MBA, with Six Sigma quality credentials and decades of experience not only designing and implementing productivity and management solutions, but using them as a “real-world” professional manager.

Choose AIM to ensure your project does not go over budget. AIM can offer fixed or ROI-based pricing. Over many years and dozens of projects, AIM has never exceeded a fixed priced budget – and never will.

Choose AIM to reduce delays and missed deadlines. AIM eliminates needless layers of management and communication obstacles inherent to traditional project teams.

Choose AIM because you want a partner with both a winning attitude and record that brings a competitive advantage to your team.
