

Manufacturing Standards Management

Manufacturing Productivity Solution

- Improve Supplier Compliance
- Automate Supplier Updates
- Improve Standards Maintenance

Problem Description

A Fortune 1000 company previously employed a manual method of creating, maintaining, and updating suppliers with their proprietary manufacturing standards. The manual system absorbed an unacceptable amount of human resources, contained errors and duplication, and created delays issuing updated standards that resulted in the delivery of unacceptable parts from suppliers.

AIM Solution

AIM developed a database-driven solution to manage the process of creating and maintaining supplier standards, track revision history for both standards and issuance to suppliers, and automated the process of updating suppliers with current standards.

Benefits

Standards duplication was eliminated, errors were reduced, the time required to manage supplier standards was decreased, and supplier updates were issued in a more timely manner all leading to improved supplier compliance and reduced rework and reject rates.

Why choose AIM?

Choose AIM to guarantee a quality project managed by a hands-on project manager, engineer, MBA, with Six Sigma quality credentials and decades of experience not only designing and implementing productivity and management solutions, but using them as a “real-world” professional manager.

Choose AIM to ensure your project does not go over budget. AIM can offer fixed or ROI-based pricing. Over many years and dozens of projects, AIM has never exceeded a fixed priced budget – and never will.

Choose AIM to reduce delays and missed deadlines. AIM eliminates needless layers of management and communication obstacles inherent to traditional project teams.

Choose AIM because you want a partner with both a winning attitude and record that brings a competitive advantage to your team.
