

Supply Chain & Inventory Management

Supply Chain Productivity Solution

- Improved On Time Demand
- Fewer Material Shortages
- Improved Supplier Response Times

Problem Description

A Midwestern manufacturing firm with world-wide distribution was tasked with improving customer on time demand through enhanced supply chain management and reduced material shortages.

AIM Solution

A system was developed that downloaded a series of open order and shortage status files on an automatic time schedule from the corporate MRP system. The information was used to feed a business analysis engine that automatically contacted suppliers based on a series of business rules related to MRP demand and material shortages. Procurement specialists were provided with additional management by exception tools to intercede on a manual basis to better manage the most critical supply chain issues to reduce critical procurement lead times and material shortages.

Benefits

On time demand was improved and material shortages were reduced.

Why choose AIM?

Choose AIM to guarantee a quality project managed by a hands-on project manager, engineer, MBA, with Six Sigma quality credentials and decades of experience not only designing and implementing productivity and management solutions, but using them as a “real-world” professional manager.

Choose AIM to ensure your project does not go over budget. AIM can offer fixed or ROI-based pricing. Over many years and dozens of projects, AIM has never exceeded a fixed priced budget – and never will.

Choose AIM to reduce delays and missed deadlines. AIM eliminates the needless layers of management and communication obstacles inherent to traditional project teams.

Choose AIM because you want a partner with both a winning attitude and record that brings a competitive advantage to your team.
