

## Global Inventory Cost Reduction

### Supply Chain Productivity Solution

- Reduce Human Resource Requirements
- Improve Reporting Accuracy
- Reduce Production Costs

#### Problem Description

A large manufacturer of industrial products was consuming an inordinate amount of time manually managing and tracking their global production cost reduction program. As a result, reporting was often late and/or inaccurate leading to missed cost reduction goals and milestones.

#### AIM Solution

AIM reviewed the manual management and tracking procedure then developed database tools for managing new and existing cost reduction initiatives, electronically importing inventory price and usage data, and generating sophisticated performance reports organized by global regions, plants, and specific cost reduction initiatives.

#### Benefits

The client reduced the number of hours required to manage the program by over 50% and improved reporting accuracy. As a result, numerous instances of erroneous reporting using the manually-based system were discovered and corrected.

#### Why choose AIM?

Choose AIM to guarantee a quality project managed by a hands-on project manager, engineer, MBA, with Six Sigma quality credentials and decades of experience not only designing and implementing productivity and management solutions, but using them as a “real-world” professional manager.

Choose AIM to ensure your project does not go over budget. AIM can offer fixed or ROI-based pricing. Over many years and dozens of projects, AIM has never exceeded a fixed priced budget – and never will.

Choose AIM to reduce delays and missed deadlines. AIM eliminates needless layers of management and communication obstacles inherent to traditional project teams.

Choose AIM because you want a partner with both a winning attitude and record that brings a competitive advantage to your team.
